

Virtual Desktop Modernization

EUC Virtual Machine Migration Service

BENEFITS

- Accelerate your adoption of the Nutanix platform by leveraging experienced consultants
- Lower migration risks with a comprehensive plan tailored to your specific requirements
- Take advantage of comprehensive project documentation and a robust knowledge transfer session

PREREQUISITES

- Required licensing available to complete migrations
- Supported operating systems as per the Nutanix compatibility and interoperability matrix
- Supported destination hypervisors (AHV, ESXi or Hyper-V) as per the Nutanix compatibility and interoperability matrix
- Operating systems must be supported by the selected migration tool

OVERVIEW

The End User Computing (EUC) Virtual Machine (VM) Migration Service is a collaborative engagement with customers to execute a previously developed desktop or remote desktop service host (RDSH) migration plan for VM workloads running on VMware ESXi, Hyper-V or AHV. The service also includes solution deployment, adoption and desired business outcomes.

A certified Nutanix consultant reviews and executes an existing migration plan to ensure that solution requirements are properly identified. The consultant ensures adherence to Nutanix- and industry-recommended best practices while minimizing cost and complexity.

SERVICE SCOPE

Execute a previously developed plan for migrating existing desktop or RDSH VMs from your current vSphere, Hyper-V or AHV infrastructure to a Nutanix-based infrastructure. Subsequently, we'll help you integrate those machines into the desktop or application brokering infrastructure. This supports the migration of existing persistent virtual desktops and template images, and also allows the migrated machines to be used by the brokering infrastructure.

This migration service allows for movement of desktop or RDSH VMs between hypervisors, where supported by the broker, as well as movement between Citrix and Horizon brokers. This supports migration of existing Citrix or Horizon templates for use with Frame.

This fixed-outcome service can be ordered in 'packs' of 5 VMs, and up to 1.25TBs per pack. For each 5-pack purchased, we'll migrate up to 5 VMs. Multiple packs may be ordered to accommodate larger quantities of VM migrations.

Migration service:

- Review and verify migration requirements, constraints, assumptions, dependencies and decisions for the migration effort, as documented in the existing plan
- Deploy Nutanix Move or VMware Converter, as required for the migration plan
- Configure infrastructure as required for the migration plan
- Execute the migration plan, process and migration waves
- Update desktop agent software for broker as required
- Register migrated VMs with the target broker infrastructure
- Execute the previously developed post-migration validation plan

DELIVERABLES

- Project schedule
- Project status reports
- Migration of existing VMs
- Migration Test Plan
- Project Close Out

TASK

	Duration
EUC VM Migration Service (EUC V2V 5-pack)	Typically 2 days

TERMS AND CONDITIONS

This document contains the entire scope of the service offer. Anything not explicitly included above is out of scope. This service offer is subject to the Nutanix Services General Terms and Conditions that can be viewed at <https://www.nutanix.com/support-services/consulting-services/terms-and-conditions>
