

NUTANIX™ | Data Protection and High Availability

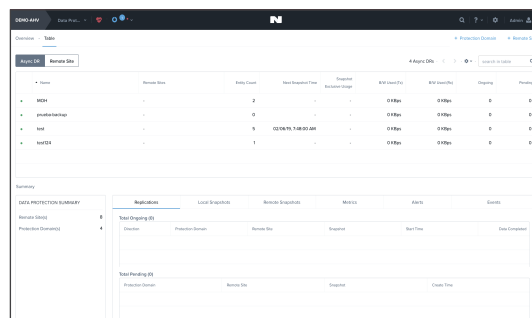

Metro Availability
Enable continuous availability across sites during planned maintenance or disasters by synchronously replicating data.

Recovery Plan
Create, validate and test failover automated plans for recovery of workloads, controlling boot sequencing of VMs.

NearSync Remote Replication
Replicate VM's across sites based on configurable schedules and with RPO of a minute across hypervisor vendors.

Rich Third-party Integration
Integration with VSS and 3rd-party tools enables application-consistent backups.

Centralized Management using Prism

Did You Know? Nutanix provides

- ✓ Shared nothing architecture with no single point of failure
- ✓ Data and meta-data redundancy
- ✓ Data integrity checks during reads
- ✓ Silent error detection for data consistency
- ✓ Automatic isolation and recovery during disk failures
- ✓ Self-service restore of individual files from VMs

When Do I Use What?

RPO	RTO	Feature	When
Zero	Minutes	Metro Sync	Major incidents
-1 min	Minutes	Near Sync	Major incidents
Minutes	Minutes	Timestream	Minor incidents
Hours	Minutes	(Public) Clouds	Major incidents
Hours	Minutes	Nutanix Xi Leap	Major incidents

Hardware Platforms

Nutanix provides a range of choices to meet your platform needs with our NX Series, as well as solutions with various validated OEM Appliances and Third-Party Server Vendors. These solutions cover options for compute or storage heavy node, all flash storage options and many more, to meet unique customer needs.
