

Nutanix on OVHcloud Solutions

Scalable platform integrates proven OVHcloud hardware and Nutanix software for complete deployments in a few hours

Key Benefits

Easy adoption

Deploy complete, ready-to-use Nutanix clusters in hours, with no long-term commitment

Data protection

Take advantage of highly resilient and secure private infrastructure that can help address European and Canadian data requirements

High performance

Choose from the latest high-grade bare metal servers to deliver maximum performance from Nutanix HCI

No hidden costs

Ingress, egress, and hardware licenses are included in the price with no surprises

Software investment protection

With the BYOL offer, license portability makes it easy to move existing Nutanix software licenses between on-premises and OVHcloud clouds

The pace of modern business requires fast and frictionless infrastructure consumption. IT teams need to spend more time delivering direct value to the business and less time procuring, deploying, and managing IT resources. Nutanix and OVHcloud have joined forces to deliver the high-powered infrastructure you need—where and when you need it. Nutanix on OVHcloud Solutions is a scalable and ready-to-use hyperconverged infrastructure (HCI) that combines Nutanix Cloud Platform software licenses in packaged or bring-your-own license (BYOL) offers, making dedicated, secure and Nutanix-approved OVHcloud Private Cloud infrastructures available in just a few hours.

A Fast and Simple Infrastructure Solution

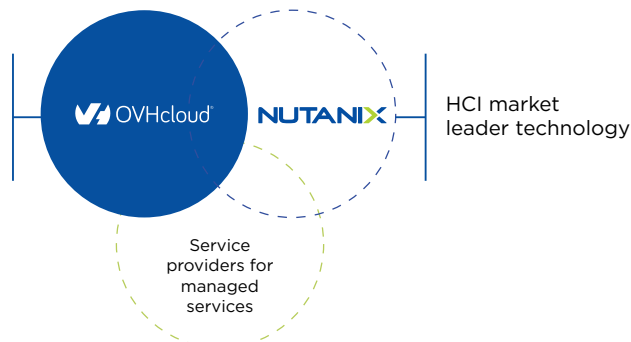

Nutanix on OVHcloud is an all-in-one, scalable platform that gives your team quick access to a dedicated, fully installed and functional Nutanix cluster. Next-generation managed hardware is pre-deployed with the Nutanix HCI software stack:

- **Licensing flexibility.** All hardware and software licenses can be provided by OVHcloud, helping to eliminate complexity and hidden costs or bring your own Nutanix license to pair with easy procurement of OVHcloud resources.
- **Monitored hosts.** Physical hosts reside in OVHcloud datacenters and monitored 24/7 by the OVHcloud team.
- **Fast to deploy and scale.** Your Nutanix cluster is deployed and available in a few hours.

- Managed hardware with pre-deployed Nutanix stack
- All in one pricing including hardware & software licenses or bring your own Nutanix license options

Next generation certified hardware

Deployed and operated in OVHcloud datacenters

OVHcloud Connect

OVHcloud Connect provides a secure, high-performance link between your company network and OVHcloud datacenters, with everything configurable via the OVHcloud Control Panel. The latest security policies ensure your data and applications remain available and secure.

An extended network enables you to connect to OVHcloud via global points of presence or via OVHcloud partners.

Getting Started

You can get assistance assessing your workloads for [Hosted Private Cloud powered by Nutanix](#) (click to go to the OVHcloud solution page) or connect with a Nutanix representative by contacting us at ovhcloud@nutanix.com.

Nutanix Cloud Platform

Nutanix Cloud Platform utilizes a modern, software-defined architecture that natively integrates all IT resources to run any application while delivering true consumer-grade simplicity, drastically reducing operational complexity. The Nutanix software stack is optimized and scalable to support the workloads your business depends on. Because Nutanix Cloud Platform runs in OVHcloud as well as on-premises and in public clouds, you can create a hybrid multicloud environment that is completely unified, enabling you to run applications anywhere without refactoring and with the same operational model and tools.

OVHcloud

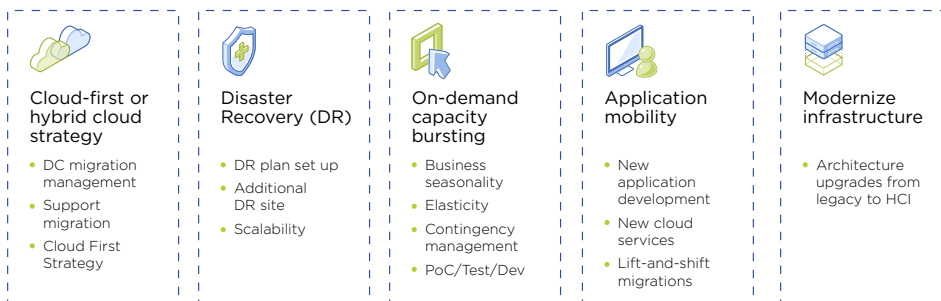

OVHcloud is a global cloud provider that specializes in delivering industry-leading performance and cost-effective solutions to better manage, secure, and scale data. The service provider manages data centers across four continents with its own fiber-optic global network for maximum efficiency.

Bare metal technology underlies Nutanix on OVHcloud, enabling you to deploy high-resilience infrastructure quickly or customize a solution to your project needs. It only takes a few clicks to start enjoying the benefits of strong performance, unlimited network traffic, and guaranteed service levels.

Secure by Design

OVHcloud vRack provides private networking for your critical workloads with extended network tunneling via OVHcloud Connect to link to your datacenters and other locations. The solution also takes advantage of advanced Nutanix security with capabilities that include a hardened software platform, data-at-rest encryption, and microsegmentation.
